# Introduction

## What is Python Wealth?

**PythonWealth is a new era of Cryptocurrency**

**PythonWealth is a friendly snake born to create a wealthy life for its holders all around the world by providing them passive income with its native token (PW) and let them even gain more profit by staking their assets.**

**It is fully decentralised, anti whale, anti dump and a community driven token built on binance smart chain for fast, secure and low cost transaction fees. All PythonWealth assets are bound by Bep-20 standards.**

PythonWealthen is a Decentralized Token, future Swap and NFT platform on Binance Smart Chain that maintains the same tested and true liquidity protection mechanism that is so important for investors. It aims to develop its own smart chain in the near future.

The PythonWealth team saw a lot of people interested in trading using a decentralized exchange, but currently the transaction fees are high, so PythonWealth team will solve the main problem that decentralized finance faced in recent past.

# PROJECTS

## Python Chain

It aims to run Python smart chain which let the other blockchains find their shortcomings through it to improve and strengthen their own smart chains.

## Python Swap

It is also planned to create its own special and unique swap with Amazing novel features never seen before in any other swaps.

## NFT Platform

NFT Platform is another feature of PythonWealth which will let the users to create, buy, sell and stake their NFT collections easily.

## Charity

Last but not least the kind PythonWealth never forget to help people in need. So a distinct percent of buy and sell tax will be donated to charity inorder to help those who are poor and sick.

# 40% BURN

PythonWealth's Total Supply is 21,000,000,000,000 which it is not possible to Mint and no more tokens can be created to increase the initial supply. 40% of the total supply was burned and got out of the cycle forever.

Burning 40% of total supply increases the credit of PythonWealth and locking 100% Pancakeswap liquidity guarantees the future development of the project.

# Why should I invest in PythonWealth?

**Static Rewards**
Get rewarded 4% of every transaction just for holding PW
**Regular Burns**
40% of PythonWealth total supply was burned
**Staking**
Get 300% APR by staking your PW
**Airdrop and Shilling contests**
Join PythonWealth Airdrop and Shilling contests to gain more PW
More interests by upcoming developments of PythonWealth
**Buyback and Marketing**
2% of every transaction will be send to buyback and marketing wallet
Buyback prevents huge dumps and Marketing guarantees price increase in the long term
